

Understanding and managing for climate risk

What sort of season can we expect for the rest of summer & autumn?

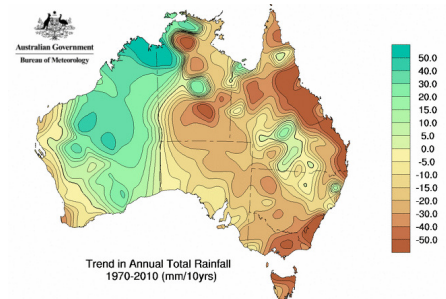

How much does the SOI impact on this region?

What is the Carbon Farming Initiative about?

How can we better manage variability?

These **Free** days are a good opportunity to get your climate questions answered by **Dave McRae** from the **Queensland Climate Change Centre of Excellence**.

“Fascinating information – David knows and explains the information very well”

Program

- what drives our climate
- review historic trends
- review the seasonal outlook
- what does the future hold – longer term predictions, risks and opportunities
- risk management – what are your climate issues / impacts / management options
- where to from here – further training opportunities for your business
