

# Improve your erosion ID and treatment skills

Are you interested in learning how to help our creeks and rivers recover after the recent flood event?

*Thursday 9th May*

*8.00am—5.00pm*

*Sugar Country Motor Inn  
220 Bourbong St Bundaberg*

*Friday 10th May*

*9.00am—4.00pm  
Bus Tour to erosion sites*

The Burnett Mary Regional Group is holding a **FREE 2 day course** on the impacts of erosion on our creeks, rivers and gullies. Learn what kind of erosion has occurred, and the best practical way to stabilise the area.

- Identify the types and causes of erosion
- Learn how to determine the appropriate selection and application of a wide range of treatment techniques
- Travel to various creek, river and gully erosion sites in the Bundaberg region and learn how to read the erosion markings in the soil in order to identify the types of erosion.

## Course presenter:

Grant Witheridge is a civil engineer with some 30 years experience in the fields of hydraulics, creek engineering and erosion & sediment control. He is the principal author of the revised Queensland Urban Drainage Manual, Brisbane City Council's Natural Channel

Design and Creek Erosion guidelines; the IECA Best Practice Erosion & Sediment Control documents, and engineering guidelines on Fish Passage Requirements at Waterway Crossings.
